SKILLS

- **Frontend:** HTML, CSS, TypeScript, React.js, JavaScript
- **Backend & APIs:** Spring Boot, Spring MVC, Spring Cloud (Config, Eureka, Gateway, Stream), Resilience4j, REST APIs, SOAP Web Services, Swagger/OpenAPI, OAuth2, OpenID Connect, JWT, Kafka, Spring AI
- **Languages:** Java/J2EE, HTML, SQL
- **Databases & Cloud:** MySQL, AWS S3, Docker, Docker Compose, Jenkins, Kubernetes (GKE), Prometheus, Grafana
- **AI & ML Exposure:** mBERT/XLM-RoBERTa, DICOM image processing, third-party AI service integration
- **Developer Tools:** GitHub Copilot, Postman, IntelliJ IDEA, Git, GitHub.

EXPERIENCE

SPAI Labs – Software Developer Intern | New Delhi

Sept 2025 – March 2026

- Built end-to-end patient management features across **React.js** and **Spring Boot** for a dental healthtech platform, covering appointment scheduling, billing automation, and secure health records — reducing clinic admin workload by **~35%**.
- Developed a **medical image upload and storage pipeline** using **Spring Boot + AWS S3** with async processing, enabling seamless integration with third-party AI services and cutting image delivery time by **~60%**.
- Delivered full-stack features across React UI, JWT-secured REST APIs, and MySQL across **8+ Agile sprints**, actively participating in **sprint grooming, design reviews, and QA testing** — owning modules from development to production with zero critical bugs.

IBM – Intern | Remote

Jul 2024 – Aug 2024

- Leveraged IBM WatsonX models to build conversational AI workflows, boosting intent-recognition accuracy by **35.67%**.
- Developed a context-aware chatbot using **WatsonX Assistant**, improving dialogue continuity and user engagement by **39.43%**.
- Engineered structured dialogue flows and entity mappings to enhance dialogue accuracy and system reliability.
- Refined models through data-driven evaluations to ensure stable performance across interactions.

PROJECTS

RideShare Backend System | Spring Boot, Spring MVC, MySQL, Hibernate/JPA, JWT, Swagger, Kafka

- Engineered a scalable **microservices-based** ride-sharing backend with pooled rides, real-time tracking, and optimized driver-passenger mapping using **Hibernate/JPA** and efficient SQL joins, with asynchronous event processing via **Kafka**.
- Designed a normalized **MySQL schema** and **RESTful APIs** for authentication, bookings, and fare estimation — reducing average query response time from **220ms to 148ms (~33% improvement)**.
- Integrated **Spring Security with JWT** and API documentation & test automation with Swagger/OpenAPI.

CI/CD Automation Pipeline | GitHub Actions, Jenkins, Docker, Kubernetes, Helm, Prometheus, Grafana

- Built a **CI/CD pipeline** using **GitHub Actions and Jenkins** automating tests, container builds, and vulnerability scans — reducing deployment time from **70s to 43s** with a **35% increase in pipeline reliability** via optimized caching.
- Containerized application workloads and deployed to **Kubernetes clusters using Helm charts**, enabling **zero-downtime rollouts** and instant rollbacks aligned with enterprise DevOps practices.
- Integrated Prometheus/Grafana dashboards for metrics & alerts, decreasing incident detection time by **45.77%**.

EDUCATION

- **B.Tech** – Computer Engineering | Jamia Millia Islamia, New Delhi| **CPI: 7.50** **Dec 2021 – Jun 2025**
- **XII** – 81% | Army Children Academy, Jodhpur
- **CBSE** – Class X | CGPA: 10.0

CERTIFICATIONS

- **Spring Boot 3, Spring 6 And Hibernate** – CHAD DARBY (Udemy)
